

## Coming Soon – A Better Benefits Experience!

**Effective July 1, Benefit Alternatives** will be administering your benefits plan with a new system. DataPath Summit is a comprehensive, cloud-based benefits administration platform that enables us to serve you more efficiently than ever before. Some of the new features you can look forward to include:

- **Real-time view of debit card transactions and manually-submitted reimbursement claims in your account**
- **Regularly updated account balances and purse values**
- **Convenient mobile app that allows you to view accounts, submit claims, upload receipts, and more**
- **Easily report lost/stolen debit cards or request new ones for yourself and dependents**
- **Much, much more!**

Prior to the effective date shown above, you will be receiving a new Summit-branded benefits debit card and instructions on accessing your Summit account online. Until then, please continue to use the debit card you already have and access your benefit accounts online as you do now.

We are excited to bring you a better benefits experience. Look for more information on Summit, coming soon. In the meantime, please use the information below to contact us with any questions.
