

Agnes Scott College's Immunization Guidelines

1. Measles, Mumps and Rubella Requirement

All students born on or after January 1, 1957, must meet this requirement, either by having been vaccinated against the three diseases (either as the combined vaccine MMR or individual vaccinations against the 3 diseases) or showing laboratory evidence of immunity to all 3 diseases.

EITHER:

Measles, Mumps, Rubella (MMR)

- *Dose 1: On or after 12 months of age (provide month and year) and
- * Dose 2: At least one month after first dose (provide month and year)

OR ALL THREE OF THE FOLLOWING:

Measles (Rubeola, Red Measles or Ten-Day Measles) - two doses of vaccine or a positive antibody titer

- * Dose 1: On or after 12 months of age (provide month and year) and
- * Dose 2: At least one month after first dose (provide month and year), or
- * Positive Antibody Titer (include copy of lab result)

Mumps - two doses of vaccine or a positive antibody titer

- *Dose 1: On or after 12 months of age (provide month and year) and
- * Dose 2: At least one month after first dose (provide month and year), or
- * Positive Antibody Titer (include copy of lab result)

Rubella (German Measles or Three-Day Measles) - two doses of vaccine or a positive antibody titer

- * Dose 1: On or after 12 months of age (provide month and year) and
- * Dose 2: At least one month after first dose (provide month and year), or
- * Positive Antibody Titer (include copy of lab result)

2. Tetanus-Diphtheria Requirement

All students must have the basic primary series of 3 doses of Diphtheria and Tetanus Toxoid (DT or Td). These are usually given with Pertussis vaccine (DPT) in infancy. In addition, all students must have a Td or Tdap booster within the past 10 years.

- * Primary series of 3 doses of Diphtheria and Tetanus immunizations (provide completion date of series), and
- * Td or Tdap booster within the past 10 years

3. Hepatitis A Requirement

All students must have a series of 2 Hepatitis A vaccinations or a positive antibody titer (include copy of lab results)

4. Hepatitis B Requirement

All students must have a series of 3 Hepatitis B vaccinations or positive antibody titer (include copy of lab results).

5. Varicella (Chicken Pox) Requirement

All students must have 2 doses of vaccine given at least one month apart

- * or a history of Varicella (chicken pox)

*or a positive Varicella antibody titer (include a copy of the lab result).

6. Meningococcal Vaccine Requirement

All students must have documented immunization with one of the following:

- *Primary dose at age 11 or 12 years followed by a booster dose at age 16
- * Primary dose at age 13-15 years followed with a booster dose at age 16-18 years
- * Primary dose on or after age 16 years with no booster needed

7. Tuberculosis Screening Requirement

All students must complete the Tuberculosis Screening Questionnaire with the Medical Evaluation Form for Tuberculosis if indicated. The form can be found at <https://agnesscott.medicatconnect.com/> "International students must have their Tuberculin Skin Test (TST) placed within the United States."
